

# David Córdoba Moreno

Senior Software Engineer | Backend | Python | AWS | Cloud Architecture

Pasto, Colombia | +57 317 835 5366 | davidico@hotmail.com | LinkedIn: david-cordoba-tec

## PROFESSIONAL SUMMARY

Software Engineer with 8+ years of experience in backend development, enterprise systems, and AWS cloud architecture. Strong expertise in Python, microservices, serverless computing, RESTful APIs, SQL/NoSQL databases, and high-availability fintech systems. Proven experience modernizing legacy platforms, designing scalable architectures, and implementing secure CI/CD pipelines aligned with business objectives.

## CORE TECHNICAL SKILLS

- Python
- Flask
- Django
- C#
- REST APIs
- BFF Architecture
- Microservices
- Docker
- AWS Lambda
- AWS S3
- AWS Cognito
- AWS Aurora
- AWS DynamoDB
- AWS Step Functions
- CloudWatch
- Redis
- SQL Server
- PostgreSQL
- Oracle
- NoSQL
- WCF
- CI/CD
- Git

## PROFESSIONAL EXPERIENCE

### Software Engineer – Cognits at HTEC Company

Oct 2024 – Feb 2026

- Developed Backend-for-Frontend (BFF) services for Hermes 2.0 integrating with legacy SOAP platform (Hermes 1.0).
- Designed serverless architecture using Python, AWS Lambda, Lambda Layers, and SST (Infrastructure as Code).
- Migrated serverless services to Docker-based microservices to eliminate cold start latency and meet fintech high-availability requirements.
- Implemented AWS Step Functions for orchestration, Redis caching layer, S3 storage, and CloudWatch monitoring.
- Maintained CI/CD pipelines ensuring secure and efficient deployment lifecycle.

### Backend Developer – Cafeto

Oct 2021 – Feb 2024

- Developed RESTful APIs using Flask with unit testing and BDD practices.
- Designed PostgreSQL and MariaDB data models using SQLAlchemy and Alembic.
- Integrated AWS services including Cognito, S3, Lambda, Aurora, DynamoDB, Step Functions, and Rekognition.
- Built and deployed containerized applications using Docker.
- Contributed to Java-based API services using Spring Boot and Swagger.

### Analyst & Developer – Falabella SAS

Jul 2020 – Oct 2021

- Analyzed requirements and developed scalable backend solutions.
- Automated processes using Selenium (RPA).
- Developed ETL processes using Pentaho.
- Built Python services and automation bots.
- Implemented API integrations and Flask web applications.

### Software Developer – Sodexo SAS

Feb 2020 – Jul 2020

- Analyzed Oracle databases and generated executive financial reports.
- Developed complex SQL queries, PL/SQL functions, and stored procedures.
- Modeled transactional banking data and business rule abstraction.

### Software Developer – Caudales y Muestreos SAS

Apr 2019 – Feb 2020

- Designed and developed enterprise solutions using C# and .NET.
- Created SQL Server schemas and complex stored procedures.
- Developed WCF services and desktop interfaces with XAML.

### Architect & Software Developer – Ladrissur Ltda.

Jun 2017 – Aug 2018

- Led requirements analysis, project planning, and system implementation using Django.
- Designed PostgreSQL schemas, triggers, and stored procedures.
- Developed web interfaces using HTML5, JavaScript, and Bootstrap.

## EDUCATION

### Specialization: Construcción de Software (In Progress)

University of Nariño | 2025 – Expected June 2026

### System Engineer

University of Nariño | 2018

## CERTIFICATIONS & TRAINING

- AWS Bootcamp – 2020
- Scrum Fundamentals & Scrum Master – 2020
- Diploma in Mobile App Development (IONIC) – 2017
- English Proficiency Program – University of Nariño
